

## YSHIELD Canopys

1/2

### Kingsize canopy (NEW-DAYLITE and NATURELL ex stock)

#### Technical data

- **Width: 230 cm, Depth: 230 cm, Height: 230 cm.**
- **Appearance: Box-shaped.**
- **Entry:** Through **two overlapping openings.**
- **Mounting:** By **four points on the ceiling.** Any kinds of bars (not included in delivery) can be inserted into the sewed fabric tunnel to stabilize the canopy installation.
- Scope of supply: Canopy, mounting materials.
- **Grounding:** Can not be grounded. LF-fields must be reduced by shielding or by turning off with a demand switch.
- **Our tip:** NEW-DAYLITE offers the best ratio between attenuation, light transmission and air exchange.

### Single bed canopy (NEW-DAYLITE and NATURELL ex stock)

#### Technical data

- **Width: 130 cm, Depth: 230 cm, Height: 230 cm.**
- **Appearance: Box-shaped.**
- **Entry:** Through **one overlapping opening.**
- **Mounting:** By **four points on the ceiling.** Any kinds of bars (not included in delivery) can be inserted into the sewed fabric tunnel to stabilize the canopy installation.
- Scope of supply: Canopy, mounting materials.
- **Grounding:** Can not be grounded. LF-fields must be reduced by shielding or by turning off with a demand switch.
- **Our tip:** NEW-DAYLITE offers the best ratio between attenuation, light transmission and air exchange.

### Universal canopy (NEW-DAYLITE ex stock)

#### Technical data

- **Bottom circumference: 1200 cm, Height: 230 cm.**
- **Appearance: Pyramidal.**
- **Entry:** Through **one overlapping opening.**
- **Mounting:** By **one point on the ceiling.**
- Scope of supply: Canopy, mounting materials, 60 cm ring.
- **Grounding:** Can not be grounded. LF-fields must be reduced by shielding or by turning off with a demand switch.
- **Our tip:** NEW-DAYLITE offers the best ratio between attenuation, light transmission and air exchange.

## YSHIELD Canopys

2/2

### Universal canopy (PERSPECTIVE ex stock)

#### Technical data

- **Bottom circumference: 1280 cm, Height: 230 cm.**
- **Appearance: Pyramidal.**
- **Entry:** Easy entry by lifting the canopy.
- **Mounting:** By **one point on the ceiling.**
- **Scope of supply:** Canopy, mounting materials, 60 cm ring.
- **Grounding:** **Can be grounded (e.g. with our grounding plug EST).** With grounding even the LF-fields are shielded.
- **Our tip:** PERSPECTIVE offers the best light transmission and air exchange of all our fabrics, combined with the high attenuation of 30 dB. Further, this canopy is conductive, so it can be grounded to shield low-frequency radiation (LF).

### Mattress pads (NEW-DAYLITE ex stock, other fabrics made to order)

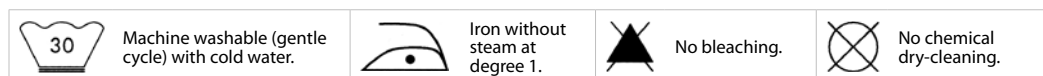

**We also recommend shielding the canopy from below, to achieve a complete Faraday cage.** This mattress pad is a sewed piece of shielding fabric that can be laid under the bed or under a carpet. Deep-pile fabrics, by default, are not supplied with lining, to both keep costs down and avoid any incompatibility with your interior design. Appropriate for our kingsize-bed and single-bed canopy. **Size for single bed canopy:** ● **Width: 150 cm; Depth: 240 cm.** **Size for kingsize or universal canopy:** ● **Width: 250 cm; Depth: 240 cm.**

### Common characteristics

**YSHIELD shielding canopies provide a simple and low-cost method for a complete shielding of beds.** Choose between box-shaped canopies for kingsize beds, single beds or as pyramidal canopies for the fast, simple and low-cost shielding. Please find the further details about our shielding fabrics NEW-DAYLITE, NATURELL and PERSPECTIVE on our corresponding catalog pages!

#### Care

#### Specially designed models

By request we provide specially designed models with 1 week delivery time.
